

ARE YOU AND YOUR FAMILY PREPARED???

Did you know that we no longer have a local siren system to alert us about severe weather? Below are two options we have to receive local weather alerts.

1. Sign up for **Tallapoosa Alerts** through our website at the link below:

<https://alexandercityal.gov/community/page/tallapoosa-alert-severe-weather>

Click on “[Tallapoosa Alert](#)” to start the process

**Make sure to click the type of alert(s) you would like to receive.

**If you don't have access to internet, the local EMA office will assist you with any questions at (256) 825-1078.

2. Purchase a **NOAA Weather Radio** (\$30-\$40) from the local Wal-Mart or Walgreens and have it setup to alert you. To setup your weather radio you can follow the steps that are provided in the below link.

<http://www.wsfa.com/story/31295198/how-to-program-a-midland-weather-radio/>

If you know of someone who doesn't have access to the above information, please assist them with receiving alerts.

Keep your eyes and ears open for when the local EMA official is in our area to assist with setting-up the above options for local alerts.
